

(a) `registerBatch( $R, 100, \dots$ )`: one segment for the whole lot

(b) `transferSegment( $S_1, distributor, 40$ )`: split, the first 40 move

(c) `transferSegment( $S_2, pharmacy, 15$ )`

(d) `consume(unit 2)` sets bit 2; `invalidateSegment( $S_2$ )` recalls $[15, 40)$
